DETAILED ACTION

1. This communication is response to Applicant's amendment filed on December 18, 2003 and supplemental amendment filed on January 14, 2004. The rejections are as stated below:

Status of Claims

2. Of the original claims 1-27, claims 1, 8, 16, 21, 23 and 26 have been amended. Accordingly, claims 1-23 are under prosecution in this application.

Summary of this Office Action

3. Applicant's arguments filed on December 18, 2003 have been fully considered, and discussed in the next section below or within the following rejection are not deemed to be persuasive. Therefore, claims 1-27 are rejected as being unpatentable over the art cited below, and Applicant's request for allowance is respectfully denied.

Response to Applicant's Arguments

4. Applicant's arguments filed on December 18, 2003 have been fully considered but they are not persuasive. Applicant's traversals are discussed under 35 USC § 102 (e).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3624

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-6 are rejected under 35 U.S.C. 102 (e) as being anticipated by Moran, U.S. Patent No. 6,430,542 B1 as discussed from the last paragraph of page 2 of paper number 7.

The applicant argued that Morgan's patent pertains to the analysis and distribution of estate upon death. Although estate planning and distribution are disclosed as some of the features of Morgan, Morgan discloses features that enable an individual to plan for short and long term goals (see at least fig. 16 and associated text).

For amended claims 1, 8, 16, 21, 23 and 26, the applicant added the terms "long-term care" to modify the type of insurance. However, this modification does not overcome the rejection because Morgan allows an individual to tailor the type of expenses and specific goals to meet one's particular needs whether it's short term or long term care (see at least figs. 16-19 and associated text).

For claim 1, the applicant argued that the Morgan reference does not specifically mention calculation of taxes. The applicant did concede the fact that Morgan discloses contributing

Art Unit: 3624

factors that include federal and state taxes. To the contrary, calculation was performed in order to arrive at a "net worth" (see at least fig. 35 and associated text). The factors that include federal and state taxes were contributing factors as conceded by the applicant in the process of arriving at a net worth.

For claims 2-7, the applicant argued that these claims are dependent on claim 1 and thus should be allowed. Additionally, the applicant also argued change of circumstances in cost. Please see response above incorporated herein.

For claims 8-15, the applicant made essentially the same argument as claims 1-7. Please see response above incorporated herein.

For claim 16, the applicant argued that Morgan "failed to suggest the sale of any assets to pay for long term care cost". Morgan specifically teaches the removal of assets to meet expenses or goal (see at least fig. 21 and associated text). Morgan allows an individual to tailor one's goals with features that include assets, liabilities, expenses and policies.

For claims 17-20, the applicant argued that they are dependent on claim 16 and thus should be allowed. Please see argument above incorporated herein.

For claim 21, the applicant made essentially the same argument as 16. Please see response above incorporated herein.

For claim 22, the applicant argued that it is a dependent claim of 21 and thus should be allowed. Please see argument above incorporated herein.

For claim 23, the applicant essentially made the same argument as claim 8. Please see response above incorporated herein.

For claims 24 and 25, the applicant argued that they are dependent on claim 23 and thus should be allowed. Please see argument above incorporated herein.

For claim 26, the applicant essentially made the same argument as claim 16. Please see response above incorporated herein.

For claim 27, the applicant argued that it is dependent on claim 26 and thus should be allowed. Please see argument above incorporated herein.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
